SUMMARY

Frontend Developer with 4+ years of experience architecting and building enterprise-scale web applications using React.js, Next.js, Angular, and TypeScript. Proven track record leading UI development for procurement, MIS, and retail-database platforms — spanning legacy system migration, microservices refactoring, real-time features, RBAC/authentication implementation, and performance optimization for production systems. Skilled in component-driven architecture, RESTful API integration, and cross-functional Agile collaboration. Adept at translating complex business workflows into scalable, accessible, high-performing interfaces.

EDUCATION

- Feroze Gandhi Institute of Engineering & Technology** Raebareli, India
Bachelor of Technology - Computer Science; GPA: 7.29 July 2018 - June 2022

SKILLS SUMMARY

- Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, C++
- Frameworks & Libraries :** React.js, Next.js, Angular, Vue.js NodeJS, Playwright, PostgreSQL, Redux, Context API, React Hooks, Material UI, Tailwind CSS, RESTful APIs, Git, Github, Styled Components
- Real-time & Rich Content:** Socket.io (WebSockets), Tiptap (rich text editor), jsPDF, html2canvas (PDF/document export), react-grid-layout (drag-and-drop dashboards)
- Expertise Areas:** Component-driven UI architecture, accessibility, performance tuning, responsive design
- AI Tools:** GitHub Copilot, Cursor and Claude AI

PROFESSIONAL EXPERIENCE

- WEB Spiders India Pvt. Ltd.** Full Time
Frontend Developer January 2026 - Present
 - Frontend Development:** Architected and developed enterprise procurement modules for **Proquro & Trafasas** — product listings, RFQ management, quotation comparison, and purchase order creation — using **React.js, Next.js, JavaScript, HTML5, and Tailwind CSS**, powering an end-to-end B2B workflow for buyers and sellers.
 - API Integration:** Integrated 10+ **RESTful APIs** across product management, RFQ, quotation, and purchase order workflows, ensuring seamless frontend-backend data exchange.
 - Real-Time Updates:** Implemented real-time notifications and live status sync using **Socket.io**, keeping RFQ, quotation, and order updates synchronized across buyer and seller dashboards without manual refresh.
 - Rich Text Editing:** Integrated a **Tiptap**-based rich text editor for capturing formatted RFQ descriptions and product specifications directly within the platform.
 - PDF/Document Export:** Built client-side PDF export functionality using **jsPDF** and **html2canvas**, enabling users to download purchase orders, quotations, and reports directly from the browser.
 - Dashboard Builder:** Developed a drag-and-drop, customizable dashboard builder using **react-grid-layout**, allowing users to configure and rearrange analytics widgets/panels to fit their workflow.
 - Authentication & Security:** Implemented **Auth0** authentication and role-based access control (RBAC) to manage buyer/seller identities and secure system access; applied Base64 encoding for safe transmission of binary data (product images) across HTTP/JSON APIs without corruption.
 - Reusable Components:** Built 20+ reusable, responsive UI components with **React.js** and **Next.js**, reducing duplicate UI code and improving long-term maintainability.
 - UI/UX & Performance:** Developed responsive, cross-browser compatible interfaces using **Tailwind CSS** and optimized application performance for enterprise users.
 - Agile Collaboration & Client Engagement:** Collaborated with backend developers, QA, and cross-functional teams in an **Agile/Scrum** environment (**Git, GitHub, ClickUp, Claude AI**); participated in client discussions and requirement gathering, translating procurement workflows into intuitive UI features.
- MONK NX Technologies** Full Time
Frontend Developer July 2024 - January 2026
 - Frontend Development Lead:** Led frontend development of the **MIS Portal Dashboard and Proquro**, reporting directly to the Project Manager and owning UI enhancements, bug fixes, and management-requested features on a live production system.
 - Report Generation UI:** Designed and delivered multiple UI screens for dynamic report generation, improving reporting efficiency and reducing average search time through optimized data flow.
 - Landing Page Revamp:** Revamped the platform landing page to improve performance and scalability, streamlining data flow and navigation for end users.

- **Security Hardening:** Strengthened application security by preventing contact-form abuse, restricting unauthorized uploads, and resolving access-control vulnerabilities.
 - **Reusable Component Development:** Developed modular, reusable components in React.js and Next.js using TypeScript and Context API, reused across multiple report views.
 - **Authentication Integration:** Integrated Auth0 authentication for secure login and role-based access control.
 - **Performance Optimization:** Improved frontend performance through lazy loading, API caching, and code-splitting techniques, reducing initial load time.
 - **UI/UX & Accessibility:** Ensured WCAG accessibility compliance, responsive layouts, and cross-browser consistency using Material UI and Tailwind CSS.
- **Wipro Limited**
Project Engineer

Full Time

April 2022 - July 2024
- **Legacy Migration Lead:** Led migration of a legacy Classic application to **React.js** within an **AWS** cloud environment, modernizing the RSDB (Retail Site Database) platform end-to-end.
 - **Microservices Refactoring:** Refactored a monolithic architecture into modular microservices, improving scalability, reducing system dependencies, and streamlining deployment.
 - **UI Module Development:** Designed and implemented React.js/Next.js UI modules using TypeScript, Redux and React Hooks; built and maintained 15+ components/screens aligned with evolving client requirements.
 - **API Integrations:** Integrated REST APIs to enhance real-time UI data flows, ensuring optimal performance and seamless data sync.
 - **Modernization & Refactoring:** Migrated legacy class-based components to React functional components using React Hooks, improving maintainability and code clarity..
 - **Testing & Quality Assurance:** Conducted end-to-end testing and wrote unit/integration tests using Jest and React Testing Library, achieving 90%+ code coverage.
 - **Client & Cross-Team Collaboration:** Partnered with clients, design, QA, and backend teams in Agile ceremonies to gather requirements, demo progress, and align on delivery milestones.

- KEY PROJECT (PERSONAL)
-
- **IPAM (IP Address Management) System (Personal Project)**
 - Technology Used: React, Next.js (App Router), TypeScript, Tailwind CSS, Recharts.
 - Developed a scalable enterprise frontend application using React and Next.js, following modern component-driven and domain-oriented architecture.
 - Implemented authentication workflows and protected routes with reusable form components and role-based access readiness.
 - Designed data dashboards with IP utilization analytics, system health indicators, audit trails, and alerting panels.
 - Built complex business workflows including IP allocation, bulk updates, pool capacity planning, and approval-ready operations.
 - Created reusable UI components (tables, forms, modals) aligned with enterprise coding and UX standards.
 - Simulated backend API integrations using type-safe TypeScript models and mock services to mirror real production systems.
 - Delivered a production-ready UI prototype validating enterprise IPAM workflows and scalable frontend architecture.
